**SAVOY ANNOUNCES ENERGY PROGRAM START DATE**  
*Notifications mail in mid-January. Program will lower and stabilize electricity costs.*

SAVOY, MA – The Town of Savoy is pleased to announce that it's launching its Community Choice Power Supply Program this spring to provide an energy program that is stable and affordable. Savoy signed an 8-month contract with Direct Energy.

Beginning with the March 2025 meter reads, the Program's rate will be \$0.10200 per kWh which is approximately 13 percent lower than Eversource's Residential Basic Service rate of \$0.11719 per kWh effective February 1, 2025. Residents can expect to see an average savings of \$9 per month through July 2025 (assuming usage of 600 kWh per month).

"The Town's overall goal is to offer our residents the opportunity to save money on their electricity costs this spring," said Justin Kaczowski, Savoy Select Board Chair. "The objective of the Program is to lock in a competitive price that provides savings now and will provide stability moving forward."

The Town's product offering meets the state-mandated minimum for renewable energy which is 63 percent in 2025. When this contract ends in November 2025, the Town will explore the possibility of joining with 17 other Berkshire County communities in negotiating new terms for their energy program which has been active since 2014.

The Savoy Community Choice Power Supply Program is a municipal aggregation program which, according to Massachusetts law (M.G.L. c. 164, § 134), enables local government to combine the purchasing power of its residents and businesses so that it can provide them with an alternative electricity supply. Approximately 190 Massachusetts communities, to date, have chosen to develop community choice electricity programs to benefit their residents and small business owners.

Residents will not notice any change in their electricity service. The only discernible difference will be that Direct Energy Services of Houston, Texas, will be printed under “Supplier Services” on Eversource’s monthly bills starting in April 2025. Residents and small business owners will continue to receive one bill from Eversource and to send payments to Eversource for processing. There will be no interruption in billing, power, or customer service.

No action is required by ratepayers to participate in this cost-saving program. The Program will be operated on an opt-out basis, meaning that all Savoy residential and business customers currently on Eversource’s Basic Service will be automatically enrolled into the Program unless they choose to opt-out.

There are no enrollment, early termination, or cancellation fees attached to the Savoy electricity program. Residents who choose to opt-out can also opt-in at a later date if they so choose at no cost. However, anyone switching from a contract with a third-party supplier may be subject to penalties or early termination fees charged by that supplier. Ratepayers should verify terms before switching.

Basic Service rates change twice a year or more, depending on rate class. As a result, the aggregation rate may not always be lower than the Basic Service rate. The goal of the aggregation is to deliver savings over the life of the program against Eversource’s Basic Service. However, future savings cannot be guaranteed.

***Residents or business owners with a supplier block on their account must contact Eversource to request that the block be removed if they want to participate in Savoy’s electricity program.***

Eversource has several programs to help income-eligible families and customers needing special assistance meet their energy needs.
